<b>Risk Rating.</b> The Risk Rating process is provided for guidance only. It is the risk assessors' evaluation of the risks that is important, and this may differ from the result indicated by the risk rating matrix. Even after taking the risk rating into consideration employers still have a duty to ensure that sufficient and adequate control measures are in place to ensure that any remaining risks are kept as low as is reasonably practicable.			
<b>Covid-19 is a newly discovered infectious disease which has caused a global pandemic, leading to closures of facilities and services countrywide.</b> <b>Main symptoms include but are not limited to: Fever, new continuous cough, loss of smell and taste. Individuals with certain medical conditions, elderly plus others are more vulnerable to Covid-19 therefore extend periods of self-shielding are recommended, in the current climate this is advised at being 12 week from the date of closure 23<sup>rd</sup> March 2020.</b> <b>This risk assessment is very much a live document and should be adapted accordingly, aligning with advise given from central/local government (CG/LG) and Public Health England (PHE).</b>			
<b>General Principles of Control</b>	The hierarchy of control measures to be implemented should follow the sequence – <ol style="list-style-type: none"> <li>1. Avoiding contact with those who have symptoms.</li> <li>2. Frequent hand cleaning &amp; good Respiratory hygiene practices.</li> <li>3. Regular Cleaning of settings.</li> <li>4. Minimising contact &amp; mixing.</li> </ol> Although the choice of control measures implemented should be prioritised from the top of this hierarchy downwards, it should be remembered that more than one level of control measures can be adopted simultaneously.	The wearing of respiratory protection (face masks) in Schools is NOT expected to be a routine control measure where no specific risk has been identified. Appropriate respiratory protective equipment/face masks are to be considered as last resort where effective separation cannot be maintained if dealing with a suspect case; This would normally be to the standard of a Fluid Resistant Surgical Mask. However, if dealing with a child with complex medical needs where aerosol generating procedures are performed an FFP3 standard face mask should be worn, for which face fit testing (FFT) must be completed beforehand.	

What are the Hazards ? (What can go wrong)	Who might be Harmed & How ?	Existing Control Measures (What are you already doing to manage the hazards/risks?)	Risk Rating with controls in place			Additional Controls Required (Where the existing controls are insufficient to reduce the risk to an acceptable level) Use the scoring table below to assist in planning actions.

Scoring Table							Risk Scoring Guide							
LEVEL OF RISK		OVERALL RATING		HOW THE RISK SHOULD BE TACKLED/MANAGED										
HIGH RISK		15-25		Immediate Management Action			Consider the potential harm or injury that could result from the identified hazard if an accident or incident were to occur, based on the table below.							
MEDIUM RISK		9-12		Plan for Change										
LOW RISK		1-8		Continue to Manage										
Likelihood (A)	5 Almost Certain	5	10	15	20	25	Impact Criteria (B)	IMPACT	SCORE	HEALTH & SAFETY EFFECT				
	4 Probable /Likely	4	8	12	16	20		Critical/ Catastrophic	5	Multiple deaths of employees, service users, members of the public, etc.				
	3 Possible	3	6	9	12	15		Major	4	Death of an employee, service user, member of the public, etc.				
	2 Unlikely	2	4	6	8	10		Moderate	3	Serious injury (acute, chronic of life-changing) to employee, service user or member of the public requiring medical intervention.				
	1 Very Unlikely / Rare	1	2	3	4	5		Minor	2	Minor injury such as a bump or bruise that may require First Aid treatment and the person returns to work.				
		1 Insignificant / Negligible	2 Minor	3 Moderate	4 Major	5 Critical / Catastrophic		Insignificant / Negligible	1	A day to day issue/problem but negligible harm would result.				
Impact (B)							Now consider the likelihood of that harm or injury being realised based on the expected frequencies in the table below.							
Risk Score							<table border="1"> <thead> <tr> <th>L i k e</th> <th>LIKELIHOOD</th> <th>SCORE</th> <th>EXPECTED FREQUENCY</th> </tr> </thead> </table>				L i k e	LIKELIHOOD	SCORE	EXPECTED FREQUENCY
L i k e	LIKELIHOOD	SCORE	EXPECTED FREQUENCY											

To calculate the Risk Score in the Risk Assessment Register above, simply multiply the Impact by the Likelihood to identify the level of risk as per the table above.

	Almost Certain	5	Reasonable to expect that the event <b>WILL</b> undoubtedly happen/recur, possibly frequently and is probable in the current year
	Probable / Likely	4	Event is <b>MORE THAN LIKELY</b> to occur, will probably happen/recur, but is not a persisting issue. Will possibly happen in the current year and be likely in the longer term
	Possible	3	<b>LITTLE LIKELIHOOD</b> of event occurring. Not likely in the current year, but reasonably likely in the medium/long term.
	Unlikely	2	Event <b>NOT EXPECTED</b> . Do not expect it to happen/recur. Extremely unlikely to happen in the current year, but possible in the longer term.
	Very Unlikely /Rare	1	<b>EXCEPTIONAL</b> event. This will probably never happen/recur. A barely feasible event.
